UX Case Study

Blinkit for Kids

Designing a Kids-Friendly Version of Blinkit

UX RESEARCH · UI DESIGN

Healthy Hero 🥦

Parental Controls 🛡️

Blinky is on the way!

BY: VRUSHTI LAKHUPOTA

PROJECT OVERVIEW

Making Grocery Shopping Fun, Safe & Educational for Kids

⚠️ The Problem

Current grocery apps are designed for adults. Kids often struggle with cluttered interfaces, accidental taps, unhealthy temptations, and lack of safe independent interaction.

🎯 The Goal

Create a playful grocery shopping experience where kids can safely browse products, learn healthy habits, and interact with the app while parents remain in full control.

💡 The Solution

Blinkit Junior introduces kid-friendly navigation, gamified rewards, parent approvals, healthy nudges, and an engaging mascot-driven experience.

DESIGN PROCESS

The 5D Approach Behind the Redesign

1. DISCOVER 🔍

Conducted user research to understand kids' shopping behavior and parent concerns.

2. DEFINE 🎯

Identified major pain points like confusing navigation and lack of parental control.

3. DEVELOP 💡

Explored ideas through empathy maps, flows, and information architecture.

4. DESIGN ✏️

Created playful wireframes and engaging UI screens for kids.

5. DELIVER 🚀

Designed a final solution focused on fun, safety, and simplicity.

USER RESEARCH

Understanding Kids & Parents Shopping Behaviors

68%

Kids are attracted to colorful and reward-based interfaces.

🔍 **72%**

Kids prefer visual browsing over text-heavy menus.

🔒 **81%**

Parents want purchase approval before checkout.

⭐ **64%**

Reward systems increase engagement.

⚠️ **51%**

Users dislike cluttered navigation.

Key Insights

😵 **Overwhelming Interfaces**

Kids struggle with crowded screens and too many categories.

🥦 **Healthy Nudges Work**

Parents appreciated educational food suggestions.

🎮 **Gamification Increases Engagement**

Badges and rewards encouraged repeated interaction.

> *"My child taps random items because the interface feels confusing."*
>
> *-Parent Interview*

> *"I like collecting points and unlocking rewards."*
>
> *-Kid User*

> *"I want kids to learn healthy shopping habits early."*

USER PERSONAS

Designing for Kids with Parental Controls

Aarav Mehta

8 Years Old

Loves snacks, games, rewards, and exploring colorful apps.

Curious • Energetic • Playful

Goals

- Find favourite snacks quickly
- Explore fun & colourful products
- Feel independent while using the app
- Discover exciting new items

Behaviors

- Clicks visually attractive items first
- Gets excited by animations and rewards
- Scrolls quickly and taps randomly sometimes
- Prefers images over reading text

Frustrations

- Too many confusing categories
- Small buttons are hard to tap
- Hard-to-find favorite products

Neha Dhawan

31 Years Old

Busy working mother who values safe, healthy, and controlled shopping experiences for her child.

Protective • Practical • Caring

Goals

- Encourage healthy habits
- Avoids accidental purchases
- Shop collaboratively with child

Behaviors

- Checks product quality and pricing carefully
- Monitors child's screen activity
- Prefers simple and trustworthy interfaces

Frustrations

- Kids adding unhealthy snacks excessively
- Confusing or cluttered app interfaces
- Too much screen distraction
- Lack of parental control features

💡 The experience must balance fun interactions for kids while maintaining trust, safety, and control for parents.

EMPATHY MAP

Understanding Kids Emotionally

Kids want fun & independence while parents seek safety & control.

Says

- I want fun snacks!
- Can I earn more rewards?
- Why can't I buy this?
- This app looks cool!

Thinks

- I hope mom approves this.
- Rewards make shopping exciting.
- Too many products confuse me.
- I like colourful screens.

Does

- Explores products visually
- Taps attractive items quickly
- Adds random snacks to cart
- Engages with animations

Feels

- Excited while browsing
- Happy when earning rewards
- Frustrated after rejection
- Curious about new products

🧠 A successful experience should balance excitement and exploration for kids while maintaining trust and transparency for parents.

EMPATHY MAP

Understanding Parents Emotionally

Says

- I want my child to shop safely.
- The app should be simple and trustworthy.
- I don't want accidental purchases.

Thinks

- Is this product healthy for my child?
- Shopping should also teach good habits.
- Can my child use this independently?

Does

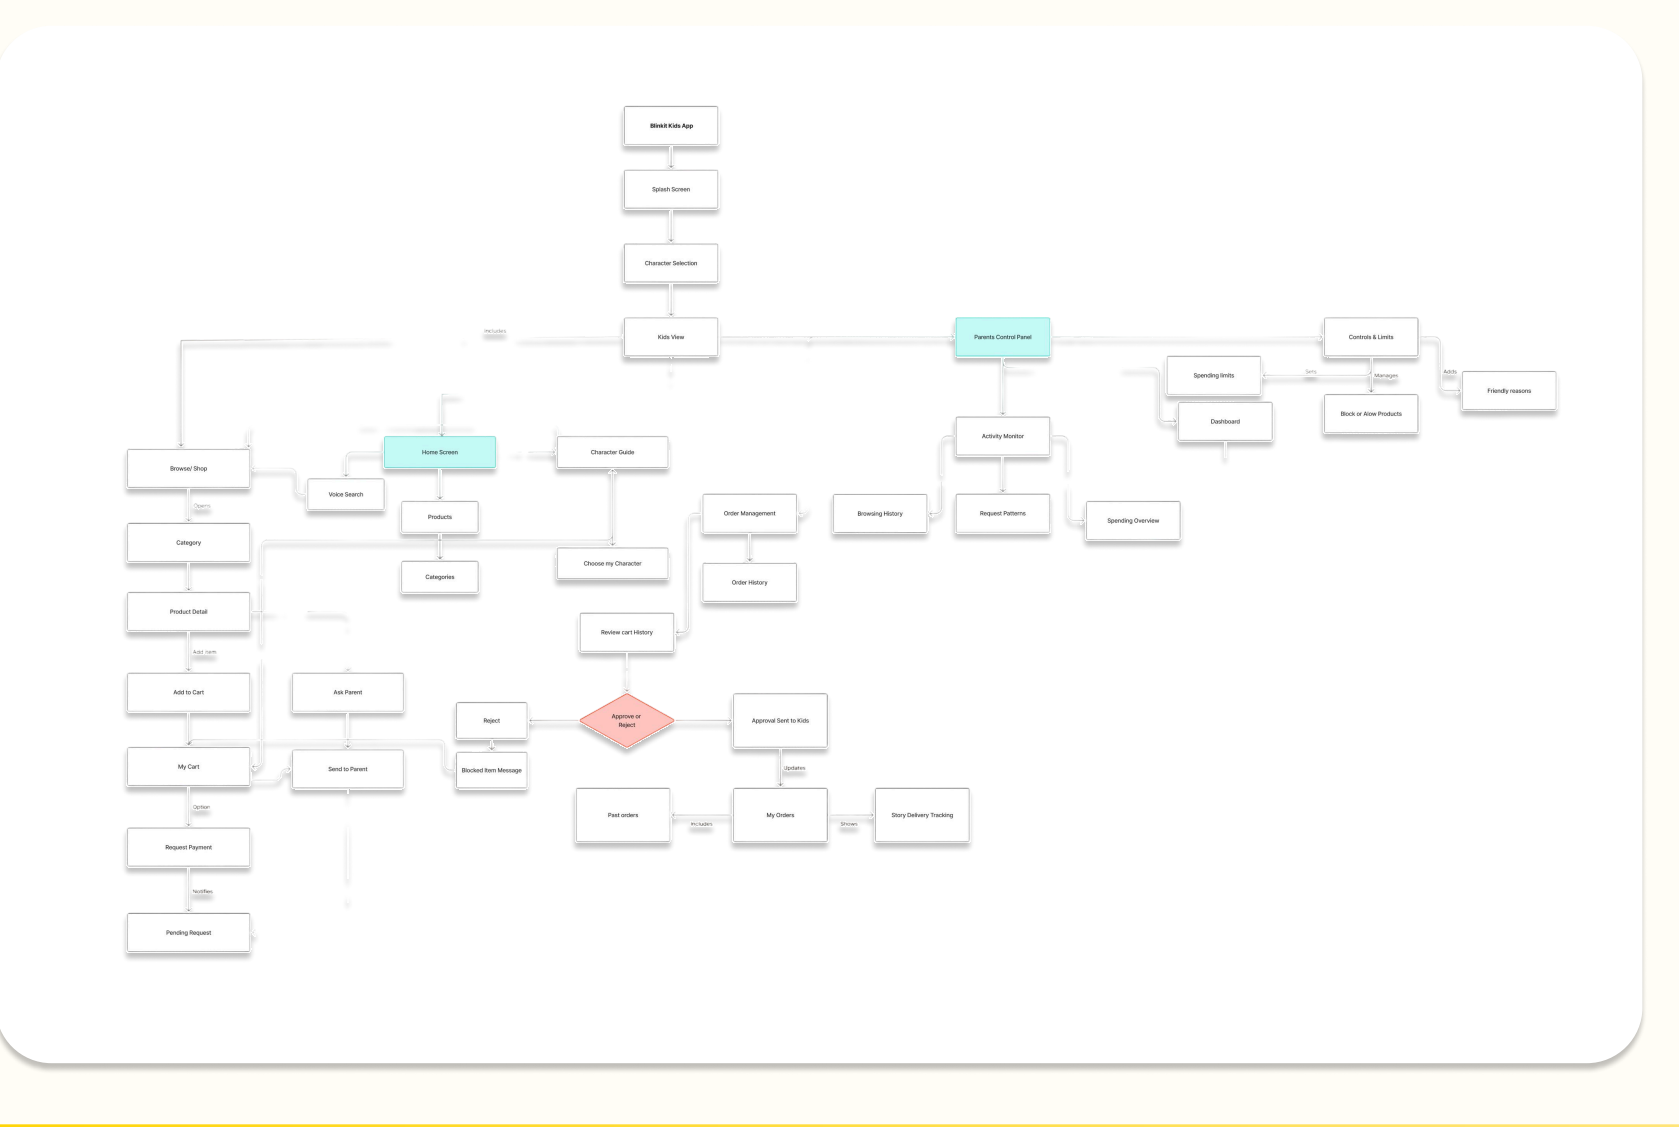
- Approves or rejects selected items
- Monitors child's activity
- Helps child navigate when confused

Feels

- Concerned about unhealthy choices
- Responsible for safe spending
- Frustrated by cluttered interfaces

INFORMATION ARCHITECTURE

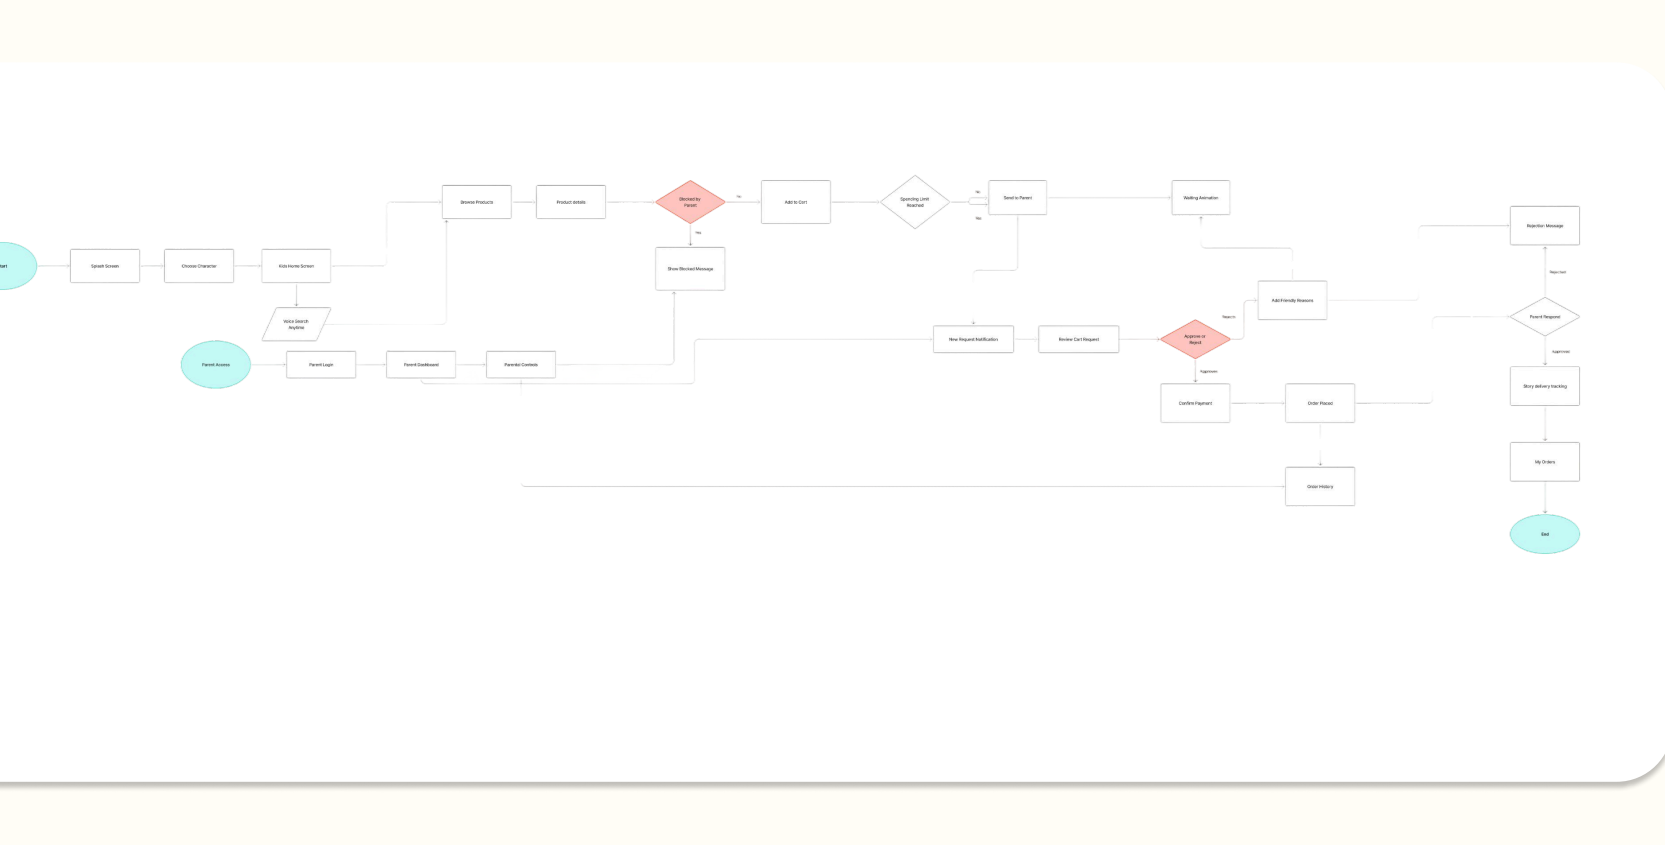
Building a Simple & Playful Navigation Structure



🧩 The navigation structure prioritizes visual discovery, simplified decision-making, and parent-controlled interactions.

USER FLOW

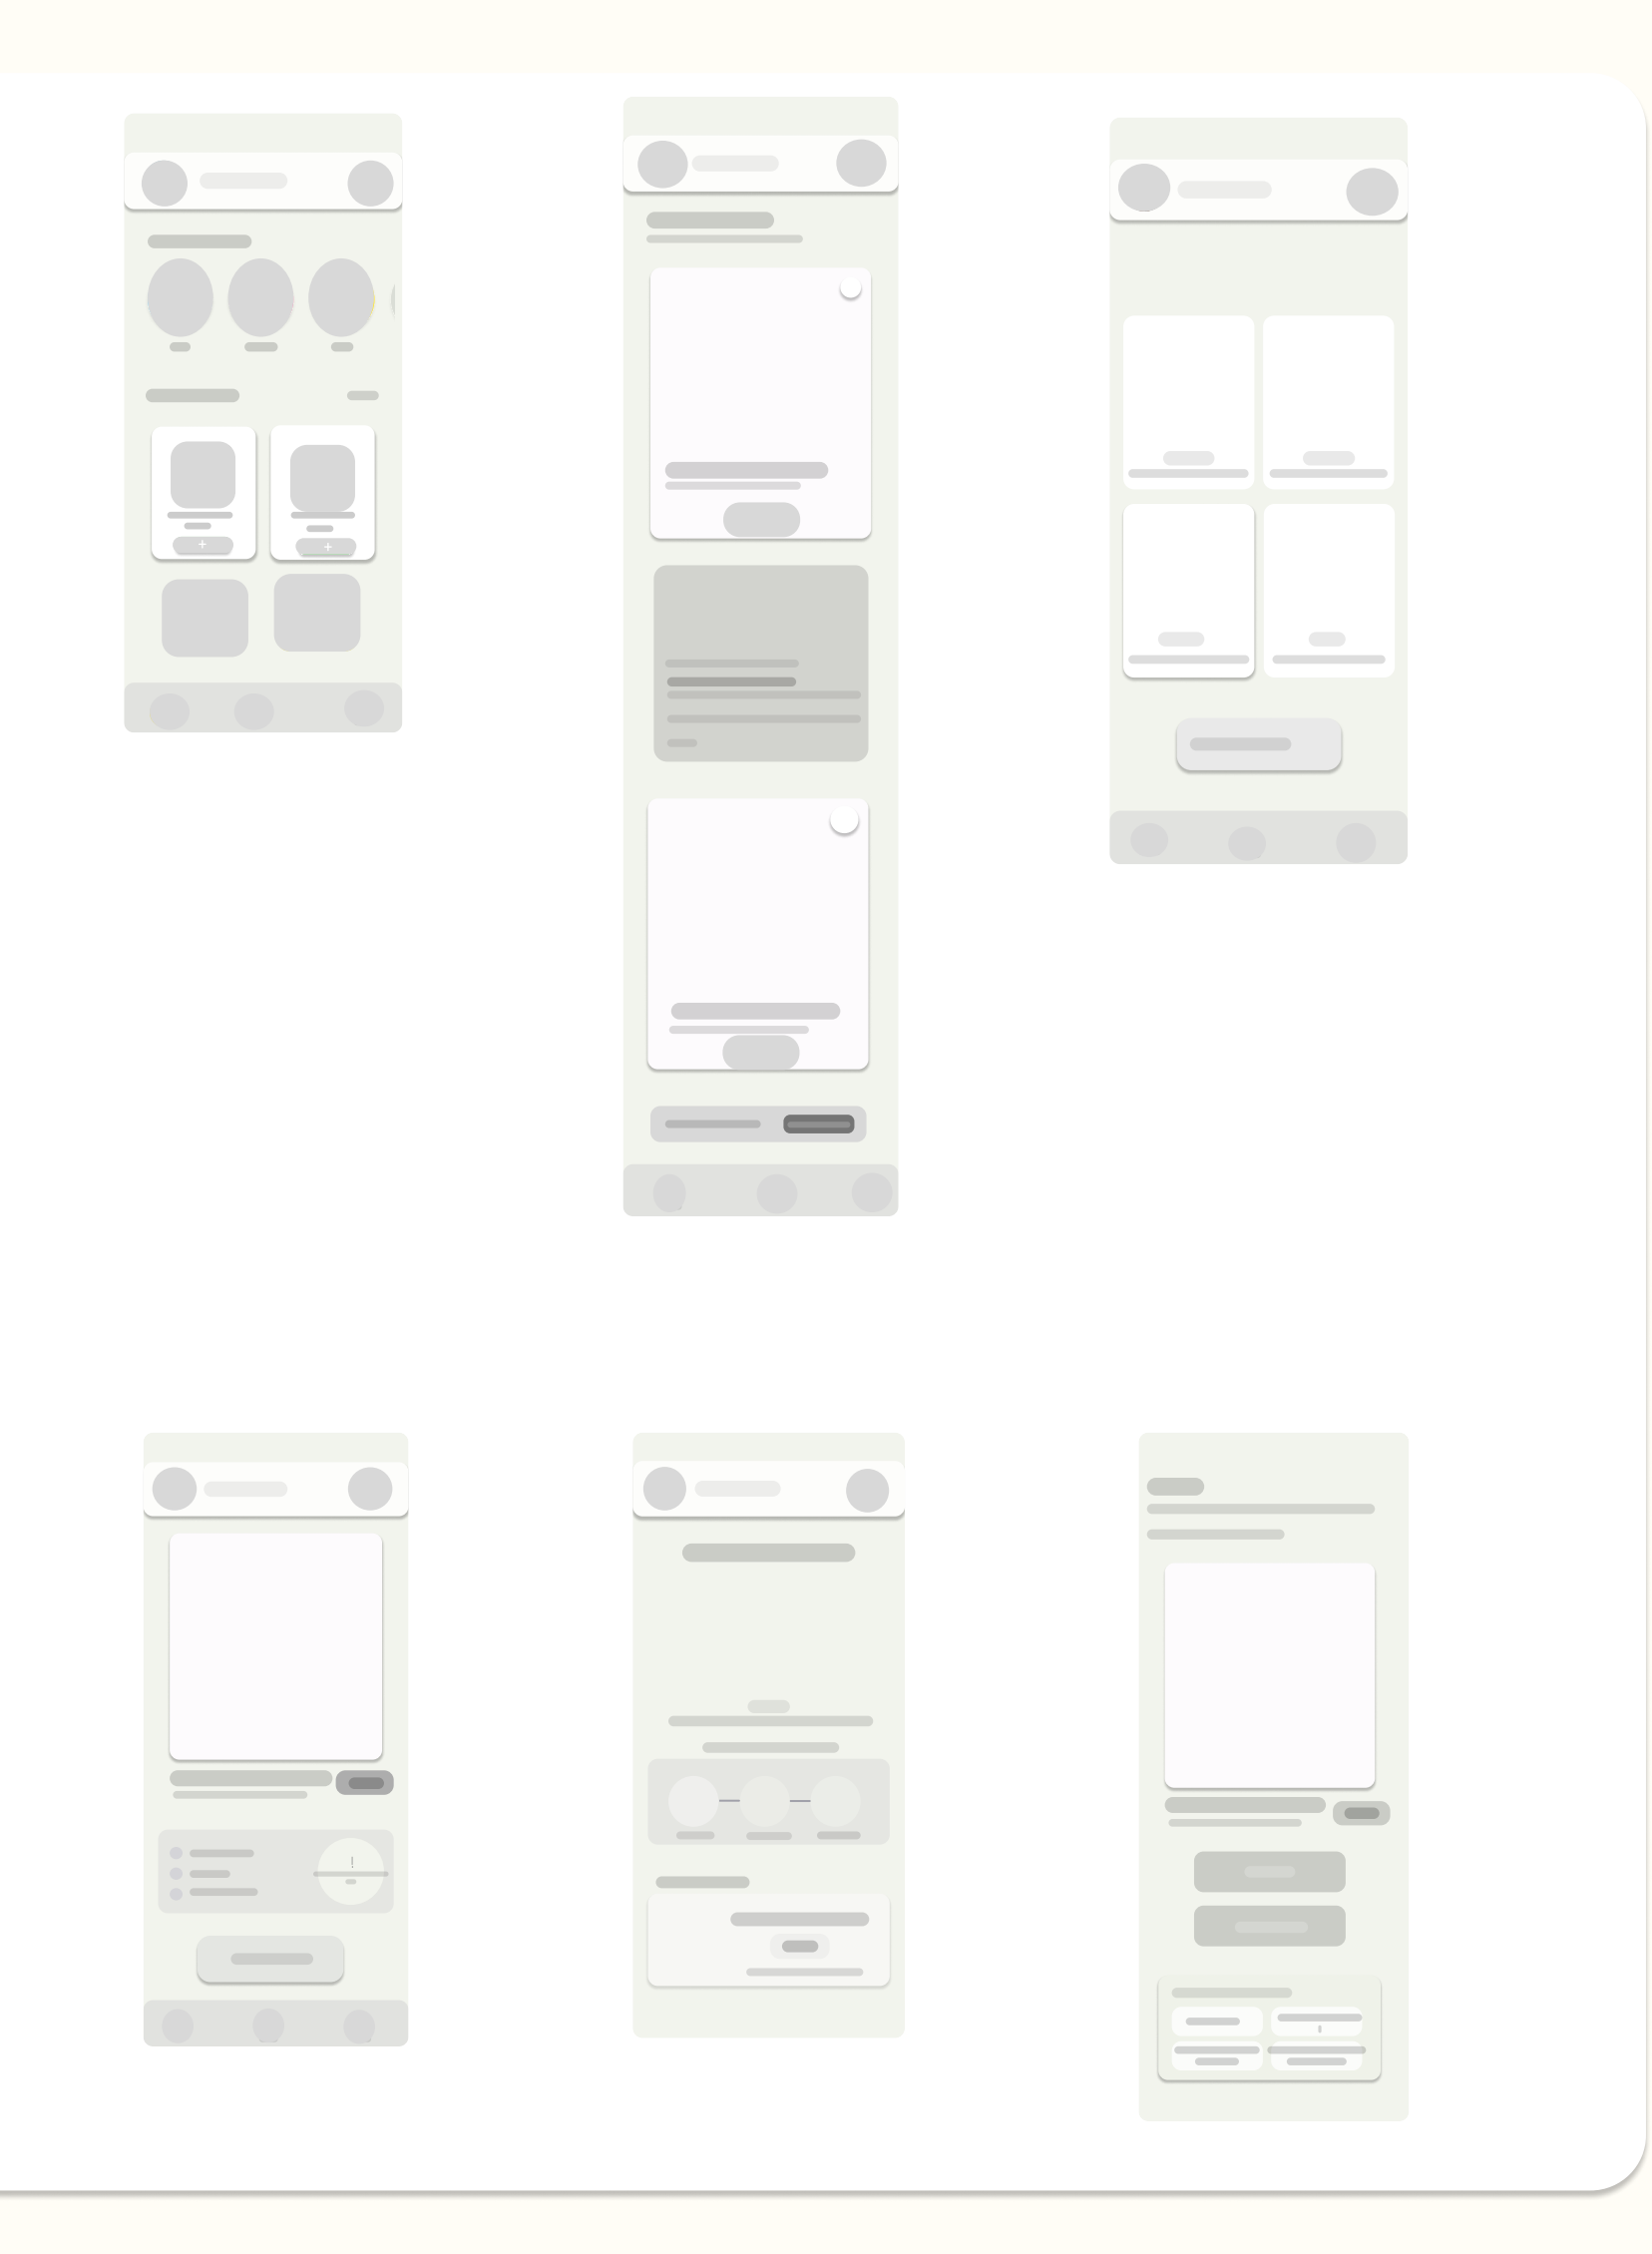
Creating a Safe & Engaging Shopping Flow for Kids



🔄 The flow balances playful exploration for kids while ensuring transparency, safety, and control for parents.

LOW FIDELITY WIREFRAMES

Exploring Early Navigation & Interaction Concepts



✏️ Early screens helped simplify navigation, improve tap accessibility, and balance fun with parental control.

KEY FEATURES

Designed for Fun, Safety & Simplicity

Parent Approval System

Parents can approve or reject products before checkout, ensuring safer shopping decisions.

Healthy Recommendations

Smart nudges encourage healthier choices without removing fun interactions.

Simple Visual Navigation

Large visuals, rounded buttons, and playful interactions make browsing easier for children.

The redesign transforms grocery shopping into a playful, collaborative, and parent-friendly experience for kids.
